Life just below our feet is abundant and diverse! It is also largely overlooked and underappreciated. According to the Soil Science Society of America, more organisms live in the soil than aboveground. Please join Coast Kids to learn about the fascinating abilities of soil critters such

as worms, underground insects, or burrowing mammals, as well as the mysterious world of fungi. We will also take a walk on the beautiful Trail of Change at Shad Landing which is about a mile long. Please bring bug spray, and wear shoes appropriate for the walk.

Number of spaces available: No limit! Please sign up for the event at www.actforbays.org/coastkids. The event is free for Coast Kids members and costs \$5 for non-members.
